

# Trimble® VRS Now™

## Full GPS & GLONASS coverage

### - Throughout Great Britain

#### Nationwide GPS & GLONASS.

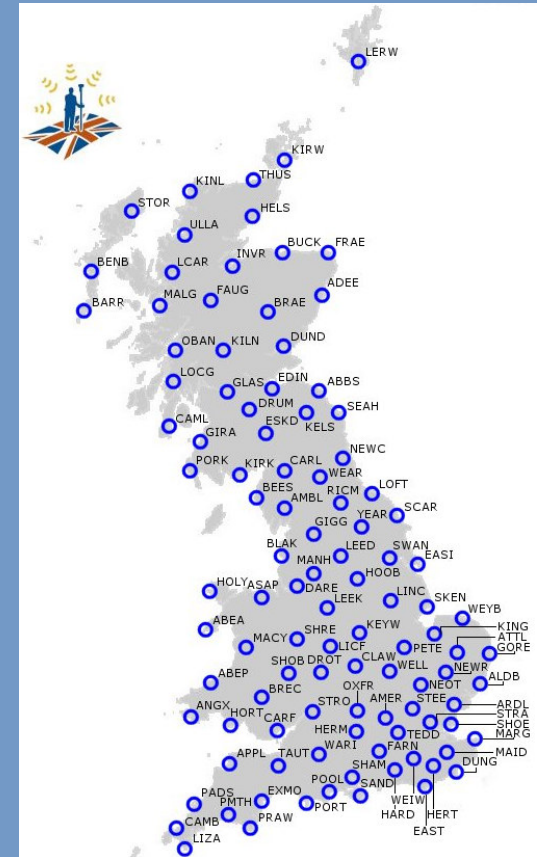

We are pleased to announce full GPS & GLONASS RTK network correction data availability throughout Great Britain.

Based on the unrivalled Trimble VRS technology, users can access a full GPS & GLONASS Network correction data solution. Trimble VRS Now is the first and only service providing this capability in Great Britain.

This GNSS capability provides users with correction data for the maximum number of satellites, thereby aiding operation in areas of limited 'sky' visibility such as urban canyons or high foliage environments. Using both GPS & GLONASS satellites can improve productivity by reducing the time required to achieve centimetre-level RTK accuracy initialisation.

This additional functionality is provided at no additional cost for all Trimble VRS Now subscribers.

Please do not hesitate to contact your authorised Trimble business partner for more information.
