## Complete care for your investment

At KOREC we are dedicated to swift support and servicing from the people who know your products best. In response to customer feedback, we've re-launched our KOREC Care Packages so you can access our technical expertise easily and more affordably.

Our two Gold and Silver options have been built to suit your requirements and can be purchased for as little as one year right up to five, whether your equipment is already in warranty or not. We've done away with complicated paperwork to offer you simple service plans at a great price.

To give you complete confidence in our offering, every KCP is backed up by Trimble Protected – an assurance from the manufacturer that your investment is in safe hands.

**Get worry-free protection today with a KOREC Care Package.**
