CANOPY

Tree survey and management software for arboriculturalists and land owners

Streamline environmental field data collection such as Phase 1 habitat, BS Tree Surveys and Bat surveys with KOREC Capture's Canopy module. Surveys can record individual points such as trees, linear features like trails and paths and areas within a polygon such as a Japanese knotweed infestation.

Canopy includes all the features of our standard Capture module, plus:

- Accurate tree plotting and measurement of height, crown and offsets
- Automated plotting of crown spread and root protection in online portal
- Complete management and reporting of tree inventories and woodland assets
- Full audit trail of tree inspections to meet duty of care responsibilities
- Workforce management and tracking of lone workers
