

## Lifecycle gully management solution for inspection, cleaning, and maintenance

KOREC Capture's Gully module is a full, end to end, gully cleansing, recording, and reporting system. Ideal for contractor use, it combines a sophisticated data collection method for managing cleaning programmes and for end clients, a high-quality record of the on-site work completed.

Gully includes all the features of KOREC Capture Pro, plus:

- Preconfigured forms for recording gully inspections including time, location, silt levels, cleaning, and defect reporting
- Ability to attach photos of works completed and rule-based form completion to ensure all data is recorded correctly
- Position and populate new gullies identified in the field using Capture. Accuracy can also be improved with the addition of external GPS if required
- Proactively administer, schedule, and manage gully cleaning operations using desktop portal
- Intelligent scheduling based on historic data held in desktop portal
- Realtime updates of full network cleaning progress and automated reporting through preconfigured dashboards
