ROADWAY

Complete digital highway routine maintenance and management solution

KOREC Capture's Roadway module makes it easy for road crews and local authorities to carry out preventative maintenance and respond to the challenges of keeping highway assets working efficiently against the tide of increased traffic volumes, climate change and increasingly complex road networks.

Roadway includes all the features of our standard Capture module, plus:

- Host and share large network asset information in the secure online portal with multiple stakeholders including contractors

- Upload multiple data sources including mobile mapping lidar and imagery data plus dynamic links to existing legacy GIS and CAD solutions

- Job assignment for asset validation and repairs plus real time updates on progress in the field

- Quickly navigate to defects and assets using Capture and then record accurate site locations and conditions

- Dashboards showing real time progress on scheme repairs plus automated daily reporting

- Workforce management and tracking of lone workers

Collect data on physical assets such as poles, masts and cables. Report issues with potholes and earthworks.

Analyse data in real-time to keep highways open and running efficiently

Respond swiftly to issues reported by ground staff or by the local authority to keep roads open
