UTILITY

Utility infrastructure asset management software

Make the maintenance of aging utility networks more streamlined by conducting underground utility, drainage connectivity and MRPS pipeline surveys via the KOREC Capture Utility module. Design, build and maintain a complete digital utility network using the simple mobile app.

Utility includes all the features of our standard Capture module, plus:

- Preconfigured forms and workflows for manhole inspection surveys

- Automated STC25 document production

- Full infield connectivity mapping

- Generate HADDMS compliant deliverables

- Ability to integrate with existing legacy asset management systems

KOREC
MAPPING

Collect data more efficiently than using generic data capture products or pen and paper

Analyse time-stamped data with the authenticated name of the field user, to ensure 100% traceability of work

Respond by dispatching ground staff to problems immediately, minimising network downtime
