Sentinel

## Providing real-time device tracking for your instrument

Powerful.
Practical.
Useful.

Trimble® Sentinel puts tracking software right in the palm of your hand.

To locate equipment, simply open the mobile app wherever you are, on any compatible device.

KEY FEATURES

- Real-time device tracking via iOS and Android™ application

- In-application, push notification and email options for device and account alerts

- Flexible location reporting intervals based on elapsed time or distance travelled

- Send device location to others via device share functionality

- Tracking device battery status

- Configurable reporting interval from 15 minutes up to 24 hours, or on demand
